Learn basic 3D design with Tinkercad - Students will design their own Pencil Sharpener shape in Tinkercad, an online 3D design and modeling tool built for beginners. We will also learn about the 3D printers at BadgerBOTS.

Once done designing, students can choose their plastic color for their 3D object. Projects will be ready to pick up a few days after the event.

Workshops located at
BadgerBOTS Robotics Education Center
7615 Discovery Drive
Middleton, WI 53562
